

# World Oceans Game

It is estimated that approximately 1 million animal species are living in the oceans of the world.

**How many ocean animals do you know?**

## How to play

- › You can split into teams of two or play individually.
- › Print and cut out the word cards, shuffling them into a pile.
- › The first player turns over a card making sure no one sees.
- › They must act/describe/give clues without saying the word on the card.
- › Those in your team can make guesses, or if playing individually, all players can guess.
- › The person that guesses the word wins the card.
- › The winner is the person or team with the most cards at the end of the game.
